EXPERIENCE

Full Stack Engineer (Freelance) | *Full-Stack & Systems Architecture* | Sept 2025 – Present

- **Software Engineering Diploma** (BrainStation): Completed intensive software engineering diploma focusing on full-stack architecture, Agile workflows, and TypeScript-driven web patterns using React, Node.js, Express, and SQL stack with Sass for styling.
- **Bizwise (Two-Week Contract)**: Built and shipped a live-chat service for Bizwise's custom-website product using Next.js, PostgreSQL, and Google Cloud Platform, rolling it out to the entire existing client base.
- **SpendShifter** (spendshifter.com): Architected a full-stack budgeting app utilizing PostgreSQL; implemented a custom SMTP microservice and Axios interceptors for secure, performant JWT-based request validation across the client-server boundary.
- **AtmoSentry** (atmosentry.com): Engineered an AI-orchestrated environmental dashboard using React 19; implemented TanStack Query v5 for complex parallel API orchestration and MSW v2/Vitest for robust, isolated frontend integration testing.
- **Cloud Infrastructure**: Deepening expertise in AWS through the Solutions Architect certification path, with a focus on designing secure, scalable system architecture.

Senior Software Engineer – SDET | *Royal Bank of Canada (via Capgemini Inc.)* | Jan 2025 – Aug 2025

- Led two Agile teams and mentored juniors in architecting test automation standards and CI/CD pipelines (Jenkins, GitHub Actions), directing technical release strategies to ensure seamless production deployments.
- Architected scalable RPA workflows and integration tests in collaboration with cross-functional dev teams to ensure system reliability during the HSBC/RBC merger.

Software Engineer – SDET | *Royal Bank of Canada (via Capgemini Inc.)* | May 2022 – Dec 2024

- Developed and deployed 50+ RPA bots automating the migration of 20,000+ clients and 500,000+ accounts into RBC systems, replacing \$5M in manual work while upholding quality via peer code reviews.
- Designed and implemented end-to-end UI and API automation frameworks using Cypress and Robot Framework, improving frontend reliability and validating RESTful services.
- Built and integrated Python data pipelines (pandas, NumPy, openpyxl) for large-scale validation and ingestion of financial datasets.

Financial Advisor – Imperial Service (IIROC Licensed) | *CIBC* | May 2018 – Feb 2021

- Ranked Top 3% of 247 advisors in Calgary (Imperial Club Award, 2020), leveraging analytical problem-solving and data-driven insights to manage client portfolios.
- Collaborated cross-functionally to launch a new digital branch, streamlining workflow efficiencies and leading oversight to ensure strict regulatory compliance.

EDUCATION

Diploma, Software Engineering — *BrainStation* | Mar 2026

Certificate, Data Analytics, Big Data & Predictive Analytics — *Toronto Metropolitan University (Ryerson)* | Apr 2022

Bachelor of Applied Science, Civil Engineering — *University of Windsor* | Oct 2016

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Python, Tailwind CSS, DOM, Responsive Design

Backend: Node.js, Express.js, RESTful Services, JWT Auth, Resend SMTP

Database: PostgreSQL, MySQL, SQL, Data Modeling

Testing & QA: React Testing Library, Vitest, Cypress, Selenium, Robot Framework, Postman, API & UI Automation

DevOps & CI/CD: Git, GitHub, GitHub Actions, Jenkins, Docker, Heroku, Webpack, Render, Netlify, Cloudflare (DNS)

Methodologies & Tools: Agile/Scrum, Figma, Vite, Jira, Confluence, Code Reviews, Version Control
